the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) (Department of Health 2000).

There is a growing emphasis on the need to improve the efficiency of the public sector, and to ensure that the public sector is able to deliver the services that are required by the public. This has led to a number of initiatives, including the introduction of competition, the restructuring of public services, and the introduction of new management practices. The aim of these initiatives is to improve the efficiency of the public sector, and to ensure that the public sector is able to deliver the services that are required by the public.

One of the key challenges facing the public sector is the need to improve the efficiency of the public sector. This is a complex task, and it requires a number of different approaches. One of the key approaches is the introduction of competition. This involves the introduction of new competitors into the public sector, and the restructuring of public services. This is intended to improve the efficiency of the public sector, and to ensure that the public sector is able to deliver the services that are required by the public.

Another key approach is the introduction of new management practices. This involves the introduction of new management practices into the public sector, and the restructuring of public services. This is intended to improve the efficiency of the public sector, and to ensure that the public sector is able to deliver the services that are required by the public.
